## SUMMARY

Computer Science and Engineering (Information Technology) student with hands-on experience in Python, SQL, web development and SAP ABAP development. Skilled in object-oriented programming, database management, and enterprise application development. Experienced in building SAP reports, Data Dictionary (DDIC). Proficient in developing Classical and Interactive ALV Reports, along with customized reporting solutions. Experienced in designing and implementing Smart Forms for business documentation Seeking an opportunity to contribute to enterprise-level SAP solutions or software developer and build a long-term professional career.

## EDUCATION

### Chalapathi Institute of Engineering and Technology

B.Tech in Computer Science and Engineering (Information Technology ) | CGPA: 8.4/10

Oct 2022 – Apr 2026

Guntur

## SKILLS

- **Programming Languages:** Python, SAP ABAP
- **SAP Technologies:** Classical Reports, ALV Reports, Data Dictionary (SE11), Smart Forms, Open SQL, Modularization, File Handling, OOPS, Basic knowledge in (BAPI, IMPLICIT EXPLICIT Enhancement, BADI)
- **Web Technologies:** HTML, CSS, JavaScript
- **Databases:** MySQL, MongoDB
- **Tools:** GitHub, VS Code, Eclipse, SAP GUI

## EXPERIENCE

### SAP ABAP Developer Intern

Techademy

Jan 2026 – Present

Bengaluru

- Developed Classical and ALV Reports using Open SQL, internal tables, and modularization techniques.
- Designed Data Dictionary (SE11) objects including Domains, Data Elements, and Transparent Tables with TMG configuration.
- Created and integrated Smart Forms with ABAP programs for business document generation.
- Applied file handling techniques and basic enhancements (Implicit, Explicit, BADI) along with BAPI usage.

### Python Programming Training

LogicWhile

Aug 2025 – Oct 2025

Hyderabad

- Developed Python programs using lists, tuples, and strings for data handling.
- Implemented object-oriented programming concepts to build structured applications.
- Worked with file handling and basic program logic for practical problem-solving.

## PROJECTS

### SAP Based Agriculture Crop Management System | SAP ABAP, ALV, Smart Forms

Present

- Designed and created DDIC tables for farmer, crop, buyer, warehouse, and sales data with proper relationships.
- Developed ABAP programs for farmer registration, crop entry, warehouse allocation, and sales processing.
- Built ALV reports for crop inventory, farmer details, and warehouse stock with filtering features.
- Created Smart Forms for crop sale documents and integrated email functionality for PDF confirmations.
- Utilized Open SQL, internal tables, and modularization techniques; applied basic OOP concepts and debugging.

### Parking Management System & Bus Booking | Python, OOPS

- Developed a multi-level parking lot system using Python with real-time slot allocation and dynamic fee calculation.
- Implemented vehicle waiting list management to handle parking overflow efficiently.
- Built a bus ticket booking system using OOP and Abstract Classes to prevent overbooking and manage cancellations.

### Online Cracker Website | Web Development (HTML, CSS, Javascript)

- Designed and developed an online cracker sales website with responsive front-end layout.
- Implemented backend functionality for product management and user interaction.
- Integrated UI and backend to ensure smooth navigation and user experience.

## CERTIFICATIONS

### SAP Certified – Back-End Developer – ABAP Cloud (SAP), 2026
